\*VAT not included

\*\*Travel and subsistence not included

\*\*\*License with limit N: Allows you to organize a session with up to N participants. A participant is equivalent to an interactive ISABEL PC, a flow-server or a session Server that only counts as a participant if it is interactive.

The license is usually stored in the PC that acts as a Server. If a server with a license for M participants connects to a session with limit N, the new limit will be increase to N + M.

Example of license with limit 3: you can organize a session with up to 3 participants. If the server is also an interactive Terminal, only 2 more clients may connect, otherwise 3 clients may connect. If another server with license for 5 participants joins the session, the limit will be increased to 8 participants (5+3).
